

NEW!

Brouwer Mobile Water Tanks

**All the water you need,
where and when you want it!**

**Available
as standard
up to 14,000 litres,
more is possible**

**Trouble-free
filling,
transport and
distribution**

**Spray range
up to 45 metres,
fully adjustable
from inside the cab**

BROUWER MOBILE WATER TANKS

bringing large volumes of water to where you

Brouwer, located in Balkbrug (Overijssel, The Netherlands), has been designing and building its own vehicles and machinery for transporting and distributing large volumes of water for many years. All of this know-how and experience has now been combined in the design of the brand-new Brouwer Mobile Water Tanks.

**Available as standard
up to 14,000 litres
- and more is possible!**

Standard mobile water tanks are available with capacities of 2000, 4000, 9000 or 14,000 litres. Even more capacity is possible - just talk to us. Each tank is fitted with several baffles so that transporting the

tanks is trouble-free and comfortable. The tanks can be transported on every open wagon or vehicle and have 4 securing points. The 14,000 litre tank is supplied on a container chassis.

Built-in pumps for rapid filling and emptying

Each tank has a built-in pump so that it can be filled and emptied independently. Depending on the required capacity, these pumps are driven by a Deutz, Perkins or Honda engine. This means that the filling time for each tank is always less than 10 minutes and a large spraying capacity is guaranteed.

180 degree rotating water canon, fully controllable from the cab

Each tank is fitted with an adjustable water canon that can be rotated through 180 degrees. The driver controls this from the cab using a simple control panel which allows the canon to be moved to any required position and the required volume of water to be controlled. The canon can be fitted with a variety of nozzles and has a range of up to approximately 45 metres.

want it - trouble free.

Technical Data

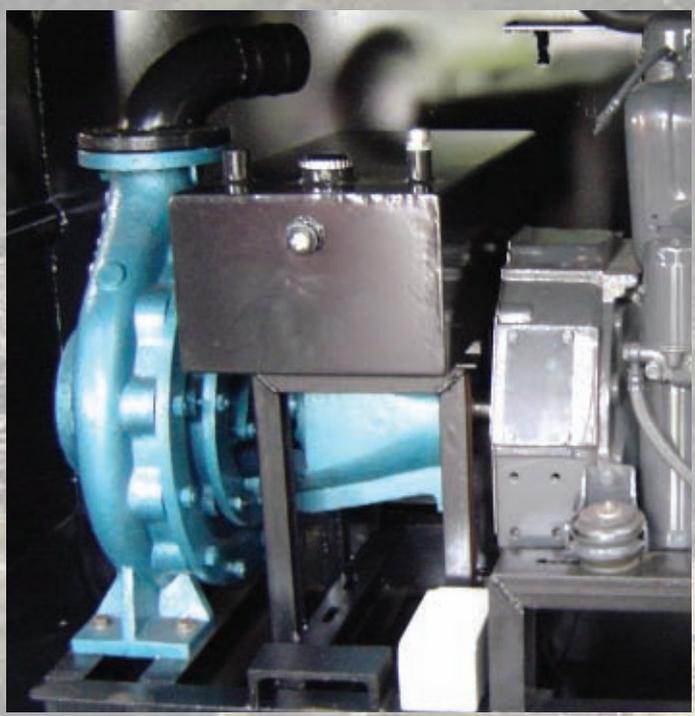

Capacity	2.000 litres	4.000 litres	9.000 litres	14.000 litres
Dimensions (l x w x h tank + pump mm)	approx.	2250x1800x1000	3750x2000x1200	5400x2200x1200
Tank weight (net)	500 kg	900 kg	1300	2000
Total weight	700 kg	1100 kg	2125 kg	2875 kg
Vent nipples	2"	2"	2"	2"

Canon range	approx. 34 m	approx. 34 m	approx. 53 m	approx. 52 m
Engine	diesel	diesel	diesel	diesel
Engine kw/hp	Honda 1 cyl. 6.5 kw	Honda 1 cyl. 6.5 kw	Deutz 4 cyl. 32 kw	Deutz 6 cyl. 48 kw
Canon + engine control	electric control panel	electric control panel	electric control panel	electric control panel
Start	electric	electric	electric	electric
Water pump max.	65 m ³ 1000 L/min.	65 m ³ 1000 L/min.	100m ³ 1600 L/min.	150 m ³ 2500 L/min.

Options

- Hot-dip galvanised
- Customised livery (colour, logos, etc.)
- Hose reel

Note

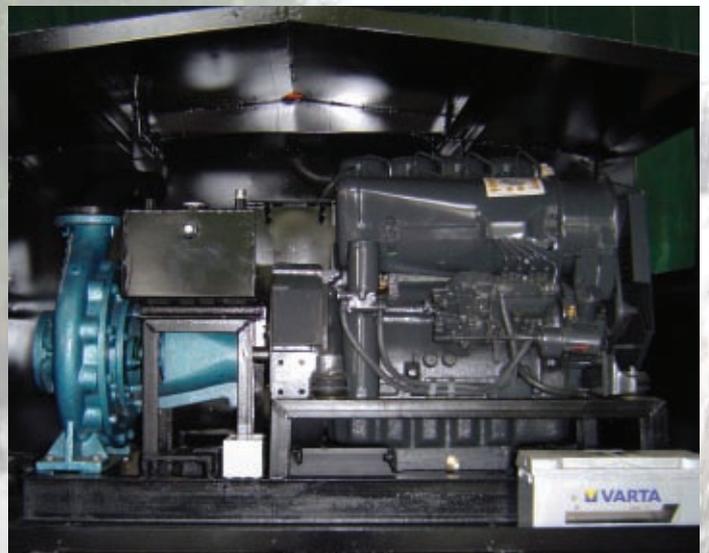

Technical specification changes reserved for further optimisation.
(Construction changes reserved)

BROUWER MOBILE WATER TANKS

- Up to 14,000 litres - and more!
- All the water you need,
where and when you want it!

Built-in pump guarantees
large spray capacity and
filling time of less than 10 minutes.

Easy to use control panel
for optimum water canon adjustment
and control from inside the cab.
